

Special Issue

Data Mining and Machine Learning in Industrial World

Message from the Guest Editors

The open access Journal *Applied Sciences* (ISSN 2076-3417, IF: 2.679) is currently running a Special Issue entitled “Data Mining and Machine Learning in Industrial World”. It is our great pleasure to inform you that this Special Issue is now open for submissions. This Issue aims to gather the latest approaches based on data mining in the context of the industrial world. Original research, practical results or emerging ideas are welcomed. The main topics include, but are not limited to:

Data Mining in heavy industry. Data Mining in robotic applications. Improving defect detection using Data Mining. Improving autonomous robots' orientation, service, and autonomy using Data Mining techniques. Data Mining in Autonomous Driving. Data Mining in VANETs. For more information on the Special Issue, you can access the following link:

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
