Editorial Board Members' Collection Series: Remove of Pollutants for Green and Healthy Environment

Message from the Guest Editors

In recent years, with the rapid development of industry and the growth of the population, the problem of pollution has attracted increasing attention. There are many kinds of pollution, including air pollution, water pollution, solid-waste pollution and so on. These pollutants are closely related to people's living environment. Take water pollution as an example, mainly from industrial wastewater (paper, metallurgy, chemical and mining industries, etc.) and urban sewage. At present, there are physical methods, chemical methods and biological methods, including adsorption, precipitation, biofilm and other methods. By using these technologies to reduce or remove pollution from the environment, scientists are also working to develop more efficient methods and technologies to remove pollutants, with the aim of creating a greener and healthier environment. This Special Issue presents recent work on:

- Air pollution;
- Water pollution;
- Solid waste pollution;
- New methods and techniques;
- Green and healthy environment.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
