From Childhood to Adulthood: New Trends in Multidisciplinary Orthodontics and Pedodontics

Message from the Guest Editors

You are invited to contribute to a Special Issue of Applied Sciences entitled "From Childhood to Adulthood: New Trends in Multidisciplinary Orthodontics and Pedodontics", which will showcase recent developments in dentistry. New technologies are available to enhance the effectiveness of the diagnostic process and increase the spectrum of detectable pathologies, dimorphisms, and dysfunctions in the orofacial region, as well as providing new clinical approaches to comprehensive dental care.

The aim of this Special Issue is to provide the available evidence-based data on innovative advances and knowledge regarding diagnostic and therapeutic technologies in the orofacial field from childhood to adulthood. This may include diagnostic and treatment approaches in pediatric dentistry, traumatized patients, traumatology in deciduous and mixed dentition in pediatric patients. We also welcome studies covering interceptive and orthopedic treatments, maxillofacial surgery or otolaryngology procedures to manage craniofacial malformations and head and neck disorders as well as sleep apnea syndrome treatment.

Guest Editors

Dr. Nicoletta Zerman

Prof. Dr. Alessandra Lucchese

Dr. Riccardo Nocini

Prof. Dr. Pier Francesco Nocini

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
