

## Special Issue

# Current Status and Perspectives in Physical and Rehabilitation Medicine, 2nd Edition

### Message from the Guest Editor

In the field of physical medicine and rehabilitation, there has been continuous progress in both assessment and therapy. Modern technologies (assistive technologies, virtual motion, robotic-assisted systems or interactive wearable systems) are now widely used in medicine. With the increase in access to medical services, people suffering from pathologies that cause disabilities (stroke, spinal cord injuries, traumatic brain injuries, cerebral palsy, neuromuscular diseases, neurodegenerative and demyelinating diseases, posttraumatic conditions, etc.) should benefit from rehabilitation treatment. Physical medicine and rehabilitation are applicable to all age groups, including preterm children with neuromotor developmental disorders, as well as elderly patients suffering from different pathologies (musculoskeletal, cardiovascular, neurologic). In order to treat people with disabilities, there is a need for both modern equipment and specialized personnel (physical medicine and rehabilitation physician, physical therapist, occupational therapist, and speech therapist).

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
