

Special Issue

Recent Advances in Vision, Speech and Language Processing for Digital Human

Message from the Guest Editor

The digital human concept has recently attracted much attention from both academia and industries. Moreover, the inclusion of emotion and persona has become a new trend in the conversational digital human. The core technologies are recognition and expression of human emotion from facial expression and speech in addition to human-like dialogue generation. Multimodal integrated recognition of video and speech is also important. This Special Issue will consist of papers covering the recent advances in vision, speech and language processing for the digital human. Review and white papers are also welcome.

Guest Editor

Prof. Dr. Soo-Young Lee

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
