

## Special Issue

# Emerging Research in Behavioral Neuroscience and in Neurorehabilitation

### Message from the Guest Editors

Behavioral Neuroscience focuses on the mechanisms that affect nervous system's function and behavior. With a special interest on rehabilitation, this Special Issue is expected to report novel findings into the role of the nervous system in the production of behavior, during the full life span and following a range of neurological disabilities. Both original research and review studies exploring various aspects of neuroscience, such as perception, cognition, human movement and sensorimotor processing, emotion, memory, motor control as well as novel rehabilitative technologies, brain-imaging techniques, biomedical engineering applications are welcome to this Special Issue. ## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
