

## Special Issue

# Current Research and Future Trends in Power Electronics Applications

### Message from the Guest Editors

This Special Issue on “Current Research and Future Trends in Power Electronics’ Applications” aims to draw a picture of the current state of research in the fields mentioned above. Papers describing specific new promising solutions for switching devices, power converter topologies, control strategies, and modulations techniques and review articles on the current state of research in the above areas, highlighting future challenges and trends, are warmly welcome. The submitted manuscripts should also provide a well-defined framework of applications for the proposed solutions or reviews.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
