

Special Issue

Parallel Computing and Grid Computing: Technologies and Applications

Message from the Guest Editor

Parallel computing and grid computing have been widely used to solve computational problems, especially in optimization. And more and more algorithms and methods have been developed and applied to massive computing structures and systems.

This Special Issue is devoted to topics in parallel computing and grid computing, including theory and applications. The focus will be on applications involving parallel and grid methods of solving hard computational problems.

Guest Editor

Prof. Dr. Huai Zhang

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
