

Special Issue

Artificial Intelligence (AI) for Sensing and Unmanned Systems

Message from the Guest Editors

Countries worldwide are working to develop artificial intelligence (AI). Since the beginning of 2018 alone, more than 15 countries have launched national strategies for AI. Following the rise of the Internet of Things, network-based swarm intelligence has become an inevitable trend, and will be widely applied in many important fields, such as national defense, autonomous systems, intelligent transportation, intelligent logistics, and smart power grids. One of the core ideologies of swarm intelligence is cooperation. Accordingly, this Special Issue aims to present the state-of-the-art ideas of cooperation in swarm intelligence.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
