Advances in Oral Rehabilitation: Materials, Techniques and Clinical Applications

Message from the Guest Editors

In recent years, oral rehabilitation has witnessed significant advancements in material, technical and technological aspects. These remarkable achievements have led to numerous benefits, such as enhanced diagnostic accuracy, precise treatment planning, an improved predictability and longevity of rehabilitation treatments, increased safety and efficiency of procedures, and the overall enhancement of the patient experience and acceptance. Given the rapid pace of these advancements, it is important to publish a Special Issue that aims to keep researchers informed about the latest breakthroughs in the field of dentistry. The topics covered in this Special Issue include, but are not limited to, new developments in endodontic and restorative materials, such as bioactive systems, CAD-CAM technology, artificial intelligence in dentistry and its clinical applications. We strongly encourage the submission of translational research in the dentistry area. Original studies describing novel therapeutic approaches or materials and reviews on the above topics are welcome.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
