

Special Issue

Sustainable Technologies in Construction and Building Materials

Message from the Guest Editors

Globally, we are facing mounting pressures such as resource scarcity, climate change, and urban expansion, so the need to improve the sustainability of the built environment and construction practices is more urgent than ever. A key challenge for the coming decades is enhancing efficiency through the development and qualification of new technologies, materials, processes, and products for applications in the energy field. This matter requires collaboration across different expertise, from those studying building physics and developing technologies and construction materials with advanced energy performance and durability, to those assessing the environmental impact of infrastructure and the related social and economic aspects.

The goal of this Special Issue is to publish high-quality scientific articles dealing with new perspectives on sustainable technologies in construction and building materials.

Guest Editors

Dr. Tiziana Cardinale

Dr. Stefania Liuzzi

Dr. Chiara Rubino

Deadline for manuscript submissions

20 December 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
