Artificial Intelligence Techniques for Medical Data Analytics

Message from the Guest Editor

We are pleased to invite you to contribute to our Special Issue, which aims to explore cutting-edge advancements in the intersection of technology and healthcare. Research areas of interest include, but are not limited to, the following:

- Image processing and pattern classification;
- Radiomics;
- Mobile computing in healthcare;
- Telemedicine;
- Predictive models in epidemiology;
- Proactive Health Monitoring;
- Natural Language Processing and management of clinical data;
- Data management in health.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
