Special Issue

Novel Approaches for Software Security

Message from the Guest Editor

Software security is the practice of protecting information by mitigating information risks. In recent years, significant advancements have been made in security technology, enabling effective responses to security vulnerabilities and hacking attempts. The realm of software security is expanding at an unprecedented rate thanks to the advancements in various cutting-edge IT technologies, including AI and metaverse. The objective of this Special Issue is to present research underlying novel software security methods useful in web, cloud computing, metaverse, Internet of Things and, in the current scenario, challenges and perspectives in computer science.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
