

Special Issue

Free Radical, Oxidative Stress, and Antioxidant Impact on Human Health

Message from the Guest Editor

Oxidative stress arises from an imbalance between reactive oxygen species (ROS) production and the body's antioxidant defense systems, leading to lipid peroxidation, protein oxidation, DNA damage, inflammatory responses, and mitochondrial dysfunction. Excess ROS contribute to cellular and molecular damage implicated in neurodegenerative disorders, cardiovascular diseases, cancer, diabetes, and autoimmune conditions. Antioxidants, both enzymatic (e.g., superoxide dismutase, catalase, glutathione peroxidase) and non-enzymatic (e.g., vitamins C and E, polyphenols, flavonoids), neutralize ROS and maintain redox homeostasis. We welcome original research and review articles exploring oxidative stress mechanisms, novel antioxidant strategies, redox-targeted therapeutics, and clinical applications. We encourage the submission of papers utilizing advanced methodologies, including omics technologies, bioinformatics, and translational research models. This Special Issue aims to foster the development of novel therapeutic strategies for oxidative stress-related diseases by advancing our understanding of oxidative stress and antioxidant defense systems.

Guest Editor

Dr. Cheol-Su Kim

Department of Convergence Medicine, Wonju College of Medicine, Yonsei University, Wonju 26426, Republic of Korea

Deadline for manuscript submissions

20 January 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
