

Special Issue

New Insights into Computer Vision and Graphics

Message from the Guest Editor

This Special Issue will publish high-quality, original research papers in overlapping fields, including the following:

- Image processing/analysis;
- Computer vision theory and application;
- Video and audio encoding;
- Motion detection and tracking;
- Reconstruction and representation;
- Facial and hand gesture recognition;
- Rendering techniques;
- Matching, inference, and recognition;
- Geometric modeling;
- 3D vision;
- Graph-based learning and applications.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief
