

## Special Issue

# Application of Smart Learning in Education

### Message from the Guest Editor

Smart learning is an approach that uses technology and data analytics to optimize the learning processes of learners and groups. This method adapts to the needs of learners by providing personalized learning experiences. The following methods and technologies are implemented across diverse interactive environments to enhance engagement and learning outcomes:

- Personalized learning;
- Use of analytical tools;
- Blended learning;
- Artificial Intelligence (AI)-supported learning;
- Virtual reality (VR);
- Augmented reality (AR);
- Blended learning;
- Online learning;
- Mobile Learning.

This Special Issue includes smart learning applications in all application areas of education and educational sciences, as well as all smart and interactive research topics.

---

### Guest Editor

Prof. Dr. Huseyin Uzunboylu  
Department of Special Education, University of Kyrenia, Kyrenia, Cyprus

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
