## Advances in Food Metabolomics

### Message from the Guest Editors

This Special Issue is dedicated to advances in food metabolomics and its role in analyzing food composition, food safety, food traceability, and food classification. Emphasis is placed on the use of new metabolomics technologies that have been applied to food science in recent years, as well as the potential applications of metabolomics technologies in the food industry. However, other high-quality contributions related to the field of food metabolomics will also be considered.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
