

## Special Issue

# Cryptography in Data Protection and Privacy-Enhancing Technologies

### Message from the Guest Editors

This Special Issue delves into the multifaceted realm of Privacy-Enhancing Technologies, exploring their impact on the digital landscape. Topics of interest include, but are not limited to, the following:

- Cryptographic protocols for secure data transmission;
- Encryption algorithms and techniques in privacy protection;
- Blockchain technology for enhancing data privacy;
- Authentication and verification methods for secure access;
- Digital signatures in ensuring data integrity and authenticity;
- Multiparty computation.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
