Art and Science in Facial, Orthognathic and Maxillofacial Surgery

Message from the Guest Editor

Maxillofacial surgery plays a significant role in the reconstruction and enhancement of the human face. This issue will highlight current practices and advances in soft and hard tissue reconstruction in the maxillofacial region and discuss advances in orthognathic and plastic surgery, as well as tissue regeneration research, with significant implications for the future of facial and maxillofacial surgery. **Keywords:**

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
