

Special Issue

Bioinformatics, Computational Biology and Molecular Biology

Message from the Guest Editor

This Special Issue focuses on the integration of bioinformatics, computational biology, and molecular biology to advance research in cancer immunotherapy. It highlights computational and multi-omics approaches for studying tumor-immune interactions, identifying biomarkers, understanding the tumor microenvironment, and developing predictive models to improve patient stratification and therapeutic outcomes in oncology.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
