

Special Issue

New Advances in Clinical Dentistry

Message from the Guest Editors

The development of research in dentistry has been very productive over the last 40 years; scientific studies in vitro and on animals play an essential role in the development of innovative therapies. The work of clinicians is fundamental to putting previous studies into practice, and evidence-based dentistry is the basis for every dentist in every moment of their clinical practice. This Special Issue aims to publish clear clinical results obtained with new dental techniques, case reports with updated techniques, and the latest-generation materials and equipment. These works must cover restorative, endodontics, pediatric dentistry, orthodontics, oral surgery and periodontology, prosthetics, implantology, oral pathology, and dental materials. The aim is to spread new clinical approaches that are simple and usable by every clinician based on clear and evident results.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
