

## Special Issue

# Advances in Sensor-Based Devices and Wearables for Clinical Rehabilitation

### Message from the Guest Editors

This Special Issue delves into the intricate intersection of sensor technology and clinical rehabilitation, covering a range of topics, including the development of advanced sensor-based devices and wearables tailored to aid in clinical rehabilitation processes. The content is designed to appeal to researchers seeking a deeper understanding of the technological advancements in this field, and healthcare professionals engaged in rehabilitation will find valuable insights into how these innovations can improve patient outcomes and contribute to more effective and personalized rehabilitation strategies. Overall, the Special Issue aims to facilitate collaboration and the exchange of knowledge among experts working in the fields of sensor technology and clinical rehabilitation for the benefit of both research and practical applications.

---

### Guest Editors

Dr. Andoni Carrasco-Uribarren

Dr. Lucia Billeci

Dr. Xavier Marimon

Dr. Portela Alejandro

Dr. Oliver Millan

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
