Special Issue

New Advances in Computer Security and Cybersecurity

Message from the Guest Editor

The protection of critical infrastructure is a top priority, as vulnerabilities in these systems can cause severe economic and social consequences. This Special Issue's articles present robust strategies for shielding such infrastructures from sophisticated cyber-attacks. Furthermore, the integration of cybersecurity measures within cyber–physical systems is highlighted, underscoring the importance of securing the interconnected elements that manage physical processes through computer-based algorithms. The journal's convergence of these themes results in a comprehensive overview of current trends and future directions in the field of computer security. This collection of research provides deep insights into technological advancements and discusses the broader implications of these developments for society and policy-making.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
