

Special Issue

Advances and Applications of Audio and Speech Signal Processing

Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Topics may include (but are not limited to) the following:

- Audio and speech modeling, speech coding and transmission.
- Single/multiple microphone signal processing for speech enhancement/separation, sound source localization/tracking, speech dereverberation, active noise control, and echo cancellation.
- Audio for multimedia and audio processing systems, e.g., audiovisual speech enhancement/recognition/localization.
- Bioacoustics and medical acoustics, e.g., using EEG/fMRI measurements to assist speech processing.
- The detection and classification of acoustic scenes and events, and the modeling, analysis and synthesis of acoustic environments.
- Music information retrieval, and music signal analysis, processing and synthesis.
- Speech quality and intelligibility measures, auditory modeling and hearing instruments.
- Speech production, speech perception and psychoacoustics.
- Speech synthesis and generation, and spatial stereo sound production.
- Automatic speech recognition.
- Speaker recognition and identity/privacy preservation.

Guest Editors

Dr. Jie Zhang

National Engineering Research Center for Speech and Language Information Processing (NERC-SLIP), University of Science and Technology of China, Hefei, China

Dr. Douglas O'Shaughnessy

Énergie Matériaux Télécommunications Research Centre, Institut National de la Recherche Scientifique, Quebec, QC J3X 1P7, Canada

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
