

Special Issue

Advances in Structural Health Monitoring in Civil Engineering

Message from the Guest Editor

The degradation of infrastructure is one of the most severe problems in the field of civil engineering. Structural health monitoring plays an important role in maintaining the safety and serviceability of degrading infrastructures. Techniques related to structural health monitoring have been actively studied in recent years. Although many methods have been proposed for structural health monitoring in these studies, there remains a wide range of possibilities. This Special Issue aims to collect papers related to advanced studies in the field of structural health monitoring. The methodology is not limited only to the techniques that are extended from conventional ones. Papers proposing new and original ideas are very welcome.

Guest Editor

Prof. Dr. Yoshikazu Kobayashi

Department of Civil Engineering, College of Science and Technology,

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
