

Special Issue

5G Network Planning and Design

Message from the Guest Editor

5G is around the corner, and there is a general consensus that it is poised to change the world as we know it! It promises a wireless future that will offer unprecedented connectivity for people, places, and things everywhere. Compared with former generations, 5G has been greatly enhanced; hence, it will need to address quite stringent requirements in order to live up to its potential and hyped expectations.

This Special Issue, “5G Network Design and Planning” aim to invites active researchers and industrial professionals to submit original articles focusing on innovative algorithms and methodologies, with a solid theoretical background and practicability, that will optimally exploit the latest advancements of 5G towards achieving the utmost efficiency in the way that 5G networks (Core, Backhaul/Fronthaul, and Access) are designed, planned, and eventually operated.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
