

## Special Issue

# Sustainable Materials and Waste Recovery

### Message from the Guest Editors

We would like to invite you to contribute a paper to a Special Issue we are co-editing on the topic of “Sustainable Materials and Waste Recovery”. The aim of this Special Issue is to provide best practices in waste valorization, including waste to materials, and material recovery as part of the circular economy. This Special Issue is inspired by the United Nations Sustainable Development Goal 12. We welcome applied research including case studies that can be related to problems of interest to waste researchers, practitioners, and/or policymakers. Case studies must describe results that can be applied beyond the specific location. Manuscripts regarding modeling and software development are acceptable if combined with lab experimental results.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
