

## Special Issue

# Advances in Sustainable Eco-Geotechnics

### Message from the Guest Editor

Soil-related disasters such as slope failure and sandstorms are becoming more frequent worldwide due to climate change and increasing human engineering activities. These disasters have not only caused huge losses of people's lives and property but also seriously damaged the ecological environment. For the sustainable development of humankind, scientists have established and developed an emerging interdisciplinary discipline in recent years, namely ecological geotechnical engineering, to address major world challenges such as climate change. Topics of interest include but are not limited to the following:

- Soil mechanics;
- Rock mechanics;
- Ecology;
- Biology;
- Atmospheric science.

---

### Guest Editor

Dr. Chong Wang

School of Civil Engineering and Mechanics, Lanzhou University,  
Lanzhou 730000, China

---

### Deadline for manuscript submissions

closed (10 November 2023)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
