

## Special Issue

# Cosmetics Ingredients Research

### Message from the Guest Editor

Chemical research into new active substances is developing fast and so is our understanding of skin function and the metabolism of cosmetics ingredients. Research focusing on cosmetics ingredients enables us to expand our knowledge of the permeability of such ingredients through the skin and within the organism as well; excipients which are used to facilitate permeation into certain skin levels are becoming more and more complex. This Special Issue aims to collect research within the area of cosmetics ingredients. **Keywords**

- artificial skin
- artificial epidermis

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
