# Processing, Preservation, and Quality Evaluation for Meat and Meat Products, 2nd Edition

# Message from the Guest Editors

This Special Issue, titled "Processing, Preservation, and Quality Evaluation for Meat and Meat Products, 2nd Edition", aims to comprehensively elaborate on the innovative techniques and methods employed in the processing and preservation of various meat products, including an assessment of their overall quality. Manuscripts focusing on innovative preservation methods to prolong shelf life and enhance the flavor of meat and meat products are highly desired. Additionally, studies pertaining to environmentally friendly processes that convert meat into products characterized by both safety and high nutritional value are also welcome. Product quality assessments may encompass physicochemical and microbiological analyses, as well as evaluations of consumer acceptance. This Special Issue is designed to aid food scientists and technologists in developing a diverse range of highquality meat products that align with consumer preferences and market demands.

# **About the Journal**

# Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multidimensional network.
