

Special Issue

Methods and Software for Big Data Analytics and Applications

Message from the Guest Editor

In the era of Big Data, the ability to analyze and interpret vast volumes of information has become critical for driving innovation across various industries. This Special Issue focuses on the latest developments in methodologies and software tools that enable efficient data processing, analysis and visualization. It encompasses a wide range of topics, including machine learning algorithms, data mining techniques and cloud-based solutions that facilitate scalable analytics. The Special Issue also highlights novel applications in sectors such as healthcare, finance, safety and social media, where Big Data analytics is transforming decision-making processes. Submissions from scientists, academics and industrial practitioners across the world are welcome.

Guest Editor

Prof. Dr. Jiaxing Shang

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
