

## Special Issue

# Recent Advances in Secure Software Engineering

### Message from the Guest Editors

Modern software, especially applications handling private and sensitive information, faces inevitable security threats. This Special Issue will address these challenges by showcasing recent findings and innovative perspectives on integrating security measures throughout the software development lifecycle.

We are particularly interested in papers that create secure software applications across diverse environments and implement advanced strategies to prevent malicious activities in cyber systems.

We invite researchers, professionals, and experts to share their insights and findings. With this Special Issue, we aim to enrich current knowledge, inspire new research directions, and contribute to a safer, more secure digital world.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
