

Special Issue

Advances in Innovative Construction and Building Materials

Message from the Guest Editors

The Special Issue invites you to submit scientific articles on the following topics:

- Development and improvement of production technologies of building materials and products;
- Evaluation of the quality of construction products and materials;
- Development of new composite materials, especially using local raw materials;
- Assessment of the strength and durability of building materials and products;
- Theoretical and experimental aspects of increasing the durability of construction products;
- Use of production waste in the production of building materials;
- Development of new composite materials, and theoretical and experimental aspects of assessing and increasing the quality and durability of construction products;
- Construction systems and their forecasting;
- Sustainable life cycle of structures.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
