

Special Issue

Urban Sustainability and Resilience of the Built Environments, Volume II

Message from the Guest Editors

This Special Issue seeks to showcase recent developments, disruptive new concepts, validated simulations and creative applications of urban sustainability and resilience of the built environment. Submissions are expected to focus on urban governance, urban planning, sustainable development and resilience, environmental and hazard governance, climate risk adaptation and mitigation, including energy-efficient solutions, and the built environment in general. We hope this Special Issue will bring together diverse ideas in the field of urban sustainability and resilience of the built environment, presenting exciting new practices and pointing out future directions for research and development.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
