Advances in Neurological Physical Therapy

Message from the Guest Editors

Neurological disease represents a key challenge for clinicians by causing life-long impairment and a decrease in patients' self-efficacy. The progressive aging of the world's population is causing a high incidence of neurological diseases, resulting in a need for tailored, specific, and continuous physiotherapy care.

Moreover, we are witnessing a revolution in this field: the introduction of new technologies and the expansion of robot-assisted physical therapy research represent a new era of neurorehabilitation in all care settings.

Our aim in launching this SI is to collect the last advances in physical therapy for a wide range of conditions (stroke, multiple sclerosis, spinal and brain injury, Parkinson's disease, lateral amyotrophic sclerosis, and developmental age neurologic disease), with a particular focus on the following:

Multidisciplinary rehabilitation approaches;
Studies on patients' or professionals' experiences;
Continuity of cares in all rehabilitation settings;
The introduction of new technologies to evaluate/treat neurologic patients;
Innovative studies into neurorehabilitation approaches.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
