

Special Issue

Recent Advances in Drug Design, Development and Delivery

Message from the Guest Editors

This Special issue focuses on cutting-edge approaches in drug discovery and development. Key topics include the synthesis and mechanistic investigation of novel organometallic therapeutics, the strategic use of molecular docking, Structure–Activity Relationship (SAR) studies, and the creation of innovative formulations for controlled drug release. We seek contributions that highlight the integration of molecular design with biological evaluation to achieve selective and effective treatments.

Guest Editors

Dr. Carmela Saturnino

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
