

Special Issue

Technical, Material, Structural, and Managerial Issues in Prefabricated Construction

Message from the Guest Editor

This Special Issue seeks to serve as a platform for discussing the technical, material, structural, and managerial challenges of prefabricated construction. The scope of this Special Issue encompasses a range of topics, including but not limited to those related to original research articles and reviews. Authors are encouraged to submit their work on these subjects to contribute to the discourse on prefabricated construction:

- Prefabricated construction;
- Modular construction;
- Computational design and simulation;
- Structural analysis of prefabricated building and infrastructure;
- Materials for prefabrication;
- Integrated delivery of prefabricated construction;
- Information technologies for prefabricated construction.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
