

## Special Issue

# Data Mining and Machine Learning in Cybersecurity

### Message from the Guest Editors

This Special Issue aims to showcase the latest advancements in the field of data mining and machine learning in cybersecurity. The information revolution has changed how we communicate all around the world and drawn unprecedented attention to network security issues. This Special Issue seeks to explore innovative techniques, methodologies, and tools that enhance our ability to detect, analyze, and respond to network security effectively. Authors are invited to contribute original research papers and conceptual articles addressing various aspects of network attack detection and situation awareness analysis for comprehensive evaluation of various elements in the time and space environments of overall network security. This may include topics such as intrusion detection systems, anomaly detection algorithms, data mining/machine learning-driven approaches, threat intelligence integration, and real-time monitoring solutions. In this Special Issue, we invite submissions exploring cutting-edge research and recent advances in the field of network security. Both theoretical and experimental studies are welcome, as are comprehensive review and survey papers.

### Guest Editors

Prof. Dr. Zhaoquan Gu

School of Computer Science and Technology, Harbin Institute of Technology (Shenzhen), Shenzhen 518055, China

Dr. Xiaoyang Wang

School of Computer Science and Engineering, University of New South Wales, Sydney, NSW 2052, Australia

### Deadline for manuscript submissions

closed (30 June 2025)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
