

Special Issue

Oral Microbial Communities and Oral Health (3rd Edition)

Message from the Guest Editor

The oral microbiome has a significant impact on human health and diseases; next-generation sequencing and bioinformatics provide us with valuable information on this important role. The field of research has propagated from infectious diseases to noncommunicable disease. The oral microbiome changes throughout life's stages, having an effect on dental diseases. Thus, it is essential to identify the pathogenic oral microbiome, not only for oral disease but also for systemic diseases, as it represents a mortality risk for older people. In addition, the healthy microbiome and core oral microbiome must be identified. There are many issues that must be resolved; however, information on the human oral microbiome is not enough. If you are currently engaged in state-of-the-art research that involves any aspect of the oral microbiome, you are invited to contribute to this Special Issue.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
