

Special Issue

Women in Cryptography

Message from the Guest Editor

The Special Issue, “Women in Cryptography”, is part of MDPI’s “Women’s Special Issue Series” and aims to promote, support and encourage the contribution of women from all over the world who focus their research on cryptography. Contributions to this Issue, in which a woman is either the first author or one of the corresponding authors, can be submitted as original research articles or reviews, and can cover any topic in the field of cryptography. We also encourage submissions from men, especially those related to previous research carried out by women. Suggested topics include, but are not restricted to:

- Complexity-theoretic cryptography;
- Information-theoretic security;
- Symmetric encryption;
- Public-key encryption;
- Digital signatures and message authentication codes;
- Authentication, identification and access control;
- Cryptographic protocols.

Guest Editor

Dr. Barbara Masucci

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
