

## Special Issue

# Advances in Unsteady Aerodynamics and Aeroelasticity, 2nd Edition

### Message from the Guest Editor

Unsteady aerodynamics and aeroelasticity represent two interconnected fields that are critical to the design, analysis, and operation of a wide range of engineering systems, including aircraft, wind turbines, bridges, and automotive structures. This Special Issue aims to provide a platform for researchers and practitioners to showcase their latest advancements, methodologies, and insights in these areas, fostering collaboration and knowledge exchange to address current challenges and propel innovation forward.

### Guest Editor

Dr. Flávio D. Marques

Department of Mechanical Engineering, Engineering School of São Carlos, University of São Paulo, São Paulo 13566-590, Brazil

### Deadline for manuscript submissions

20 April 2026

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
