

Special Issue

Fault Detection in Power Electronics

Message from the Guest Editors

This Special Issue welcomes submissions of recent research work on this widespread field. The call is open to a broad range of applications where power electronics is used as a stage for the dynamic system. Recommended topics include, but are not limited to, the following:

- Fault detection, fault diagnosis, and classification methods for power converters
- Artificial intelligence and machine learning fault diagnosis methods for power converters
- Fault detection and diagnosis in converters for wind turbines
- Fault detection and diagnosis in converters for photovoltaic systems
- Fault detection in photovoltaic panel arrays
- Fault detection, fault tolerance, and reconfiguration for multilevel converters
- Fault detection for converters of automotive systems
- Fault detection and fault tolerance for DC-DC, DC-AC, and AC-DC, matrix, NPC, and dual active bridge converters
- Fault detection in electrical drives, electric machines, and power transformers
- Fault detection in converters for power quality improvement

Guest Editors

Prof. Dr. Mario González García

Prof. Dr. Ricardo Álvarez Salas

Dr. Alessandro Lo Schiavo

Deadline for manuscript submissions

20 March 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
