Three-Dimensional (3D) Bioprinting

Message from the Guest Editors

The field of biomedical engineering has made significant strides in the development of 3D bioprinting techniques, which integrate 3D fabrication technologies with knowledge of biological tissue. The applications of 3D bioprinting cover the knowledge of biomaterial, scaffolds, tissue engineering, and 3D fabrication technologies that define the aim, scope, and focus of this Special Issue. **Keywords**

- bioprinting
- 3D printing
- printability
- cell viability
- scaffolds
- tissue engineering

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
