

Special Issue

Advanced Clinical Technology for Oral Health Promotion

Message from the Guest Editor

This Special Issue, titled "Advanced Clinical Technology for Oral Health Promotion", addresses the growing need for specialized oral healthcare in an aging global population. Focusing on elderly patients, it explores clinical technologies and methods to enhance oral health. These include advancements in dental implant technology tailored to the elderly, considering challenges such as bone density variations and heightened disease susceptibility. Additionally, this Special Issue examines the relationship between systemic conditions, such as diabetes and osteoporosis, and oral health, proposing new strategies and technologies for effective management. Emphasizing preventive care and education, this Special Issue presents novel tools and approaches for maintaining oral hygiene and preventing dental problems in older adults. Featuring real-world case studies and clinical trial reports, this Special Issue is a vital resource for dental professionals, researchers, and healthcare providers. It aims to offer fresh perspectives and solutions for improving oral health in the elderly, thereby contributing significantly to geriatric dentistry and enhancing quality of life for this demographic

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
