

Special Issue

Technology and Organization Applied to Civil Engineering

Message from the Guest Editors

Modern construction is more than impressive buildings; it focuses on new technologies, materials, and effective management. From planning to maintenance, innovations boost efficiency, reduce environmental impact, and enhance functionality. Technological advancements and modern management revolutionize the industry, making processes faster, safer, and more energy-efficient. These innovations create durable and economical buildings. This Special Issue on “Technology and Organization Applied to Civil Engineering” invites research on this promising area. Recommended topics include:

- Technology of construction works
- Management in construction works
- Planning and programming investments
- Modern materials and technologies
- Automation and digitization in construction
- Operation and maintenance of facilities
- Economics in planning and design
- Machine learning in civil engineering
- Socio-economic concepts in projects
- Scientific models in construction engineering
- Decision-making in project management

Submit your work to advance civil engineering through innovative technology and management.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
