Development of Innovative Cosmetics

Message from the Guest Editor

Cosmetics are mixtures of chemical compounds derived from either natural or synthetic sources. It is of great importance to carry out research that helps us to understand the efficacy and safety of these cosmetics. This Special Issue is seeking high-quality, open access papers from Editorial Board members or those invited by the editorial office and the Editor-in-Chief. Both original research articles and comprehensive review papers are welcome.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
