

## Special Issue

# Prostate Cancer: From Molecular Mechanisms to Clinical Applications

### Message from the Guest Editor

This Special Issue on Prostate Cancer (PCa) aims to provide the state-of-art on the most relevant recent advances regarding the different aspects of PCa diagnosis and treatment. As PCa is the most common cancer among men, the research in this field is rapidly evolving and many new tools are already in the daily armamentarium of clinicians interested in this pathology. The purposed articles of the Special Issue will offer to readers a comprehensive overview on PCa, from the findings of new biomarkers to improve early diagnosis to new imaging tools and new technologies for the treatment of local or advanced disease. As of this Special Issue, my proposal is to provide a complete list of dedicated works covering crucial aspects of PCa scenario, written by expert in the field.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
