Special Issue

Applications of Artificial Intelligence and Machine Learning in Games: 2nd Edition

Message from the Guest Editors

Since the early years of computing, games have been used as testing environments for new artificial intelligence (AI) methods and technologies. The study of game worlds, ranging from checkers and chess to Go and StarCraft, have greatly contributed to previous achievements in AI research. Games also set new challenges for AI systems, requiring them to be skillful and adaptable opponents, believable neutral characters, or smart and helpful teammates. The proposed Special Issue of *Applied Sciences* will provide a venue for discussing all current topics of game-based AI research. We invite works reporting original research results, as well as review and opinion papers.

Guest Editors

Dr. Maxim Mozgovov

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
