

Special Issue

Recent Developments in Condition Assessment and Maintenance Strategies for Road Infrastructure Networks

Message from the Guest Editors

This Special Issue invites original research and review articles on the following topics:

- Assessment of pavement condition in terms of quality and safety;
- Development of and improvement in pavement management systems;
- Short-term and long-term pavement performance monitoring and modeling;
- Pavement management strategies at both project and network levels;
- Rehabilitation and preservation techniques for pavements;
- Novel materials and technologies for pavement preventive maintenance;
- Pavement life cycle assessment;
- Methods for enhancing pavement resilience.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
