

## Special Issue

# Applications of Data Mining in Bioinformatics

### Message from the Guest Editors

The field of bioinformatics has seen significant advancements due to the integration of data mining techniques, which have revolutionized the way biological data are analyzed and interpreted. This Special Issue aims to explore the latest methodologies, applications, and innovations in data mining that address complex problems in bioinformatics. We welcome original research papers, reviews, and case studies that highlight how data mining techniques are applied to various bioinformatics challenges, such as genomics, proteomics, metabolomics, and systems biology.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
